College Enrollment & Student Demographic Statistics

By Melanie Hanson

Last Updated: July 26, 2022

Fact Checked

Cite this Webpage

Report Highlights. College enrollment totaled **15.85 million** undergraduate students nationwide in fall 2020, a *4.31%* decline year-over-year (YoY).

The number of total enrolled postsecondary students declined **3.29**% YoY, the most significant rate of decline in enrollment since 1951.

16.5% of all postsecondary students are in graduate programs.

Preliminary data indicate that total postsecondary enrollment in Spring 2022 fell to **16.2 million**; this would be a *14.7%* decline from Fall 2020.

19.4% of the student population is Hispanic or Latino, a 455.9% increase from 1976.

The rate of female college attendance has nearly doubled since 1947, increasing **98.1**%.

A further **369,000** students attend postsecondary institutions that do not, at the time of publication, grant degrees; most of these institutions are transitioning to higher levels of education. Students at these institutions are excluded from this report unless noted otherwise. When including these students, the nationwide total number of postsecondary students climbs to *19.36 million*.

college attendance to build savings.

Enrollment peaked in 2010 at 21.02 million.

Since 2010, enrollment has declined 9.6%.

12.0 million or 60.9% of all students, graduate and undergraduate, are enrolled full-time.

4.1 million or 20.7% of students graduate annually.

62.7% of high school (or equivalent) graduates go on to postsecondary study.

The rate of enrollment among new high school graduates declined 5.29% YoY.

Since 1960, the rate of enrollment among high school graduates increased 46.8% total (0.8% annually).

Among first-time, first-year college students, 83.0% are full-time students.

As many as 6.6% of American adults are currently enrolled in college as part-time or full-time students.

In the 2019-2020 academic year, 1.075 million enrolled students were foreign-born.

College Enrollment by Degree

College enrollment statistics indicate that, whether they earn their degree or drop out, most undergraduate students make one attempt to complete their college education.

73.0% of college students at all education levels attend public institutions.

77.7% of undergraduates attend public institutions.

Among the 3.53 million undergraduates who attend private institutions, 77.5% attend nonprofit schools.

48.8% of graduate students attend public institutions.

62.0% of undergraduates are full-time or full-time equivalent (FTE) students.

4.43 million college students graduated in 2021†.

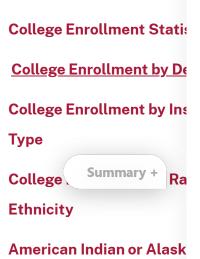

24.6% received associate's degrees.

49.9% received bachelor's degrees.

20.8% earned master's degrees.

4.7% earned doctorates or professional degrees.

50.8% of all bachelor's degrees are in 5 fields.

College Enrollment by Race or Ethnicity

Demographic statistics are imperfect because many people do not fit easily into just one category. Not all races are represented, and some data, especially when it is historical, use obsolete definitions and terminology. The language of this report conforms to the language used in available data sets.

51.6% of college students are White or Caucasian.

76.4% of White or Caucasian students enroll at 4-year institutions.

As a percentage of the entire student population, nonwhite student attendance has increased 185.5% since 1976.

Black and Hispanic students enroll in higher numbers in community colleges and less-selective four-year institutions. College Enrollment Statis

College enrollment statistics indicate that many students are willing to travel out of their home state for their college education.

California has the highest number of enrolled college students at 2.58 million, a 105.2% increase since 1970.

Florida, New York, and Texas are the only other states with more than a million college students enrolled.

Alaska has the smallest student population with 22,106 students enrolled; that's a 133.4% increase since 1970.

Wyoming, Montana, and Vermont all have fewer than 50,000 enrolled college students.

New Hampshire and Utah have seen the largest increases in enrollment rates since 2010 at 149.6% and 54.7%, respectively.

45 states have seen a decline in postsecondary enrollment since 2010.

lowa and Alaska saw the largest declines in enrollment since 2010, losing 42.9% and 32.9% of their respective student populations.

lowa and Alaska also saw the largest YoY declines, losing 45.5% and 36.5% of their respective student populations.

The only jurisdictions to see an increase in the number of students enrolled since 2010 are: New Hampshire, Utah, Idaho, Delaware, and Texas, as well as the District of Columbia.

New Hampshire and Utah had the largest YoY student population growth at 11.3% and 3.77%, respectively.
